

Migration to Oracle / Hyperion Performance Management

One of the nation's leading marketers of propane gas, fuel oil, and related products and services needed to migrate their SAP BW applications to the Oracle / Hyperion Performance Management platform. This migration will transfer the following mission critical applications: Customer Gain/Loss, Price Standardization, National Accounts, and Invoicing.

An initial assessment was conducted of their current environment and presented to management which provided a clear and concise path to the new Oracle environment and the many benefits they would derive from this migration.
